" In my opinion I assumed Sasha Chanoff was a women who was a humanitarian involved in helping rescue the Democratic Republic of Congo in the beginning . However it turns out Sasha is actually a Man . I had to watch the video twice to figure that out .</p> <p>Anyways in the beginning the audience felt that Sasha is a trustworthy man so is " by the book " but toward the ending with a little convincing from Sheikha Ali .</p>	0.0173

I found that part to be the most shocking , just like Iyanna Brown . It was very sad to see a specific tribe targeted and killed for such foolish reasons .</p> <p>I also agree that the fact that the baby was as small as a baby doll was very saddening and it made me take much pity on the Tutsi people .</p> <p>I think that Sasha and Sheikha are good representations of what being a humanitarian is all about . Sasha and Sheikha took risks to save the life of numerous people of the Tutsi tribe . Although the moment is still bittersweet because they were taken away from their family and the life that they have always known . The video shows that it is only right that we assist and help out people who are less fortunate than us because it is the human and morally correct thing to do .</p>	0.0196

I can not fathom in a million years how any human being can go through was the great and resilient Tutsi people have gone through . This is because no one human being to be subject to persecution from their government which has a duty and obligation to protect and defend their people not to criminalize and kill them such as the government of the Democratic Republic of Congo . Even through all of this darkness there is light at the end of this dark tunnel and that light is Sasha and Sheikha .</p> <p>These two outstanding individuals who helped to mend the sorrow and heartbreak in the Tutsi people are due credit for their handling of this situation .</p>	0.0192

First , scientists are now and have always been ” caught up in the culture wars . ” Simply reviewing the history of science and scientists , I ca n’t imagine how any thoughtful person could see it otherwise . Second , ” the wedge between scientists and a certain segment of the American electorate ” could not possibly have been made deeper by the March for Science . Consider the people who disdain you and your work , Mr. Young . Do you think the March on Science might really change their attitudes one way or the other ? On the other hand , the March for Science and associated activism can help the nation as a whole better recognize that science matters to them - to their health , to their safety , to the storehouse of knowledge that their children and their children will inherit .</p> <p>Such activism also shines light on the fact that science and its benefits are under attack by the leaders of our current government .</p> <p>For my part , I briefly considered not traveling to Washington D.C. to march in the cold rain last Saturday , but then decided that doing so was a patriotic and moral duty . This effort preceded the Nuclear Test Ban Treaty . He and his wife actually marched in front of the White House with signs on a cold winter day . JFK and Jackie invited him in for dinner . Pauling got the Nobel Peace Prize for this work following his receipt of the Nobel Prize in Chemistry in the early 1950s . I was thinking of Pauling when I went to the Mall last Saturday . In the 70s and 80s he advocated for better world - wide nutrition calling this issue the most important global issue . Following this advocacy , NIH started funding nutrition research . The Pauling Institute moved from Palo Alto to Oregon State University in the mid-1990s and thrives today as a legitimate leader in nutrition research .</p>	0.017

But , while there may still be some in the science community who are in awe of what God created that permeates their work , the March this weekend , did not show evidence of that on the whole . I 've read some comments online that actually attack religion and deny God . I find that incomprehensible that anyone who seriously looks at the world can deny God . There is no human creation , no discovery that does not begin and end with what God created . And God help us if science is all we have to rely on because they are totally inadequate for the job . And they 've taken the good that God created and twisted it into something entirely different . God created horses that were part of a human ecology for transportation and science created automobiles whose air pollution is threatening humanity . The industrial revolution brought air and water pollution , pesticides and chemical fertilizers . Monsanto is threatening our very food supply by attempting to collect all the seed in the world and tampering with it . We would not have nuclear weapons if it were not for science . And for every supposed medical advance there remain an increasing number of incurable diseases . So unfortunately , though the science community seems to view themselves as somehow doing good in the world , their track record says otherwise .</p>	0.0192

I for one do feel a lot of pressure to succeed or achieve bigger goals . Mostly this is due to my mom and her wanting me to get into a good college . Part of this can be attributed to the fact that neither of my parents went to college and that some of my cousins have been really successful and are doing / did very good in school and college . Eventually I just started to ignore or pay less attention to these standards being set and just do as well as I can to satisfy myself .</p> <p>I 'm sure everyone has been under judgement in some way based on a decision they made but if people are going to judge you there is no point in listening to them .</p>	1.0 0.0098

My parents try to lightly push me because they want me to be successful in life , but have given me the option to do whatever I want in life , whether that be going to college or pursuing a career right out of high school . I think the judgement Ms. Mitchell 's peers placed on her when she told them of her decision to go to Spelman was a little unfair and might have been hurtful . In the past I occasionally received judgement for the colleges I plan on applying to or the career path I want to pursue , but I am able to brush it off and not let it influence my decisions .</p>	0.0101

<b>END</b> 58e201e47c459f24986d8057	<b>END</b> 22089085	<b>END</b> Having grown up in Concord , MA I am quite surprised by this account of Walden Pond . I get the impression that the author wanted to tell a story – about denigration of nature , about vanity in modern society – and sought out details to tell that story , ignoring anything that did n't fit .  While Walden Pond is of course not pristine , I do n't believe the situation is nearly as dire as the author portrays .  For example , the Concord Landfill – bemoaned for its proximity to Walden Pond – has been capped for many years , since well before this article was written . The Landfill is now used for public yard waste composting , a used paint exchange ( so the paint can be reused ) , and a large photovoltaic array . Concord , MA made the news in 2013 for being one of the first communities to ban sale of small bottles of bottled water . In addition to splashing around in the shallows , many swimmers regularly swim the entire distance across Walden Pond , or its 1.7 mile circumference . What is more an act of solitude than swimming in open water ? One swimming website even uses Thoreau 's 1846 map ! And as for the horror of selfies , perhaps the author will note that Thoreau 's Walden was autobiographical ! Humans have been recording themselves and their actions since the beginning of history .	1.0 0.0229

Can on find solitude at Walden ? Absolutely ! The crowds tend to concentrate on the beaches near the entrance .</p> <p>One can find quiet spots along the edge of the pond if one is willing to do some walking .</p> <p>As for me , I 'm just as happy that not so many people want to bother with that extra effort . And in literally two or three minutes one can walk into the woods around Walden and experience blessed solitude and enjoy the same sorts of transcendent insights once enjoyed by Thoreau and Emerson . Due to a serious drought and perhaps some other causes presently not well understood the water level at Walden is at a historical low point . Seeing the pond with half of its normal water missing is distressing to regulars like me and must be puzzling to first time visitors .</p>	0.0227

Solitude and self - reflection CAN be found at the Pond . It s there to be had if you go in search of it . Go beyind the beach . Go beyind the Pond itself . It s there . Only then will you discover that it s been inside you all along . Walden has trees ; there were almost no trees when Thoreau lived here . Walden has solitude within those trees , away from the bustle at the beach .</p> <p>Walden Pond is NOT denigrated or defiled .</p>	0.0237

590269a07c459f24986dc8be	22303044	<p>There are a minority of players who chose to skip the scouting combine and the NFL Draft party , and still play in the league . A player has more volition than this article presents . If you have excelled at the college level , you may simply have the NFL scouts and coaches come to your school on a pro day , and go through some rudimentary drills like the 40 yard dash . No colonoscopy required . Almost every Division I university has a pro day . Then on draft day you may wait for your phone to ring wherever you wish to be . It 's a risk . You may not get as much money if you are not selected on the first or second day of the draft . However , it 's not as big a risk now as draft picks have their money limited by the latest collective bargaining agreement . The really big money comes in free agency after the initial contract . ( Ironically , it is sometimes better for a player not to be drafted in the late rounds , because as a free agent competing teams bid up the money for the player 's services . ) These guys go to the scouting combine on their own free will .</p> <p>Is it a bit impersonal ? Yeah . But they want to enhance their chances of making it as a professional . I would say the exploitation of players at the college level by coaches and athletic directors receiving millions is a much bigger scandal .</p>	0.0115
590269a07c459f24986dc8be	22301684	<p>Football has a free training system of junior leagues , high schools and colleges . The NFL has failed to protect players from deadly head injury and it is well documented that they even employed shill medical professionals to attempt to discredit Doctors who discovered chronic traumatic encephalitis of the brain and its causes . From early on these boys and men are used solely for their athletic potential and prowess . As quickly as that ability fades or crashes , the NFL and colleges jettison them . There is no doubt that they are treated as commodities and that the NFL shows no common decency or humanity in treating them as such . Attend a stock trading show and you will see so many parallels to the ' combine ' that it will sicken you . The NFL represents the worst instincts of our society and of business interest in the way it conducts it 's business with players . And other sports are following suit . As it trickles down to youth soccer programs , little league baseball and many other activities , it infects a society with a joy draining manic push for generations of young people .</p> <p>If you watch the NFL , pay for the swag and promote it with your interest , you are part of the problem .</p>	0.0118

While the cited deaths are concerning , I 'd be curious to know the patient cases under which they occurred . A common side effect of opioid use is respiratory depression , and health care providers should be diligent in assessing their patients after their administration . I am not trying to diminish the potential harm these drugs can have on their patients , rather bringing to light other factors that might have been at play in those unfortunate events .</p> <p>Of course , providing a " warning " on a drug 's labelling is one step , but I 'm not convinced this FDA labelling will largely decrease the amount of potential abuse or adverse side effects taking place .</p> <p>Even more crucial is the education of our patients using these drugs on how to recognize signs of respiratory depression or signs of potential overdose . Labelling patients as " ultrarapid metabolizers " removes the onus from providers , which is not only unsafe , but removes responsibility from prescribing providers .</p>	1.0 0.0275

58f93cf27c459f24986db421	22243743	<p>The liver has multiple drug metabolizing enzymes called CYP that do have genetic variants based on race . CYP2D6 ultra-rapid metabolizers can convert codeine to morphine and tramadol to its more active metabolite in larger quantities than people with usual or poor CYP2D6 function . Morphine is about 6000x more potent than tramadol , so the risk of a hypermetabolizer creating more codeine - &amp;gt ; morphine conversions ( and thus getting oversedated ) is higher than a hypermetabolizer of tramadol - &amp;gt ; to its more active metabolite . But tramadol is something more than a pure opioid . It also has neuropathic effects . It is a downstream regulator that reduces pain signals traveling from the spinal cord to the brain ( i.e. , recognition of pain ) .</p> <p>It also lowers the seizure threshold and can trigger a seizure in those susceptible ( which includes pregnant patients with preeclampsia ) .</p> <p>Tramadol also will not help people who can not convert it to the active metabolite ( called CYP2D6 poor metabolizers ) . The same patients also do not benefit from codeine . These two opioids are not useful in the treatment of acute pain . They cause opioid side effects , and have unpredictable effects . It would be safer to use a lower dose of an opioid that is not dependent on drug metabolism ( such as morphine ) .</p>	0.0255

Tramadol is mostly metabolized in the liver by the CYP2D6 enzyme , and a simple 23 andme saliva test will give you enough information that , if run through an SNP conversion website like Genetic Genie , will tell you if you have a mutation on that enzyme that makes you an ultra-rapid metabolizer or not . Additionally , I believe there is some debate about which variation is more dangerous - ultra rapid or slow . My understanding was that ultra-rapid metabolizers were at risk not from build - up , but from the drug working itself too quickly out of the body and thus not doing it 's job .</p> <p>With tramadol this would n't be a huge problem but with drugs such as clopidogrel which rely on a consistent amount of drug being in the body in order to work , ultra-rapid metabolizers are in grave danger .</p> <p>( Clopidogrel is metabolized by CYP3A4 ) . Neither populism nor elitism are harmful to the arts – au contraire . Populism and elitism work simultaneously , and often synergistically , to fortify the arts . Many of us , for example , are first exposed to what Schilinger calls ” populist ” art forms : cartoons , rock concerts , or comedy . These help us get our foot in the door . They ’re more inherently attractive than , say , a ballet performance . But , from these popular tastes more intricate and nuanced ones are born . 58ef4c2b7c459f24986d9ff4	22201030	What really impresses me about opera and classical music that is " old " , is the expression of shaping phrases , like musical rainbows as Pablo Casals called them , and with the musician 's own personal power to pull it off .  They can go from very soft to very loud and back again to create this flow of emotion and intensity , and I do n't need an English translation to pick up on this . The brain looks for and finds patterns : in classical music , meaning can be fuzzy and of our own interpretation .  END	0.0162

I love her more than I can describe in words , miss her when we 're apart , relish every second I 'm with her , and still insist on taking time for myself . It 's that time I take , time my husband takes , time we take together , that make us better parents . If we went to a resort for a week , I think 3 or 4 half or full days plus a couple evenings of alone / us time sound about right ( of course that 's assuming we know she 's enjoying her caregivers / activities ) . I would n't want to limit childcare to evenings . It would be so nice to take a few hours a day to lounge by the pool with a book , go snorkeling , go for a hike , get a massage , work out , grab lunch .... and spend time with my daughter too ! There 's room for all of it . What works for one family wo n't work for another - so is n't it nice there are many different options out there ? But for us working parents , with young kids who have early bedtimes , we see so little of them during the week that I can not imagine leaving them behind with strangers to go have fun alone . It would not be fun for me , thinking I 'm missing time with them , and thinking of how upset they 'd be to be left behind ( on a * family * vacation ! ) . Do n't get me wrong , I sorely miss alone daytime time with my husband , but sacrificing precious time with my kids is not the answer . Not while they are awake anyway . Family vacation is a time for the family to bond and spend quality time together . Now , after the kids go to bed , that 's a different story . That 's when we get our alone time , and that 's where babysitting help is the most needed . We will travel with another family with kids this summer , and will take turns watching the kids and going out . We will also be in adjacent hotel suites so the adults can gather in one suite 's living room for chats and drinks after bedtime , with the visiting adults bringing a baby monitor over from their suite . That 's the best and cheapest ( free ! ) option for us .	0.034

If they had a man dressed as a bee it would make compelling Telenovella a la the Simpsons . The writers also badly need a lawyer consulting . The jury selection for the banker that went to jail was only a day or two after his arrest . In real life these would be many months apart at best . And this episode was perhaps the worst . Even on that day we were beaten 8 - 2 in one match by ( the hated ) ManU . ManU deserved to win , but van Persie missed a penalty and a sitter . What Wenger has lost is his spirit . It is as if he does n't want to win . And I hate him for that . Money in the bank and not spent ? What is the purpose ? I looked at my facebook feed and I have wanted him gone for 4 years ! But he leaves that faint hope always . No . They will not win another league under him . A final of the Champions League is beyond their reach under him . He can stay for another year . He is an undisciplined discipline nightmare . Did Wenger think he was going to change him . Did he at least think he could dominate a midfield like Vieira could ? I understand Arsenal has always been a seller of talent . By 1979 , only Pat Rice remained from the 1971 double winners . By then Ray Kennedy had two European Cup winners medals ... at Liverpool . After the 1979 landmark FA Cup win over United , the team went to the Final of the Cup Winners Cup , lost in a shootout to Valencia , then sold their two best players , Liam Brady to Juventus , and Frank Stapleton , to United . But these days the team sells , and the replacement talent is of diminished quality . Bacary Sagna out , Mathieu Debuchy in , and Hector Bellerin found by accident ? Now he has regressed . At what football club , at the highest level or not , does the manager decide when to go , or to stay on indefinitely . There was one other one , and one only , and he was made a knight of the realm , and won a whole lot more than Wenger did , including the European Cup , twice , and beaten finalists two other times . The design was to develop Highbury as real estate to finance the construction of the Emirates , home of the highest ticket prices in the land , and the source of the greatest game day revenue in creation .</p> <p>But , against all logic , as the stadium was paid off , the team got less successful , less able to compete in the Champions League , further from a League Championship .</p> <p>From 2006 - 2008 , the team was a losing finalist , and semifinalists in the Champions League . Similarly , in Bayern 's treble season , they had a Mikel Arteta free kick to win the tie , but he skied it . This year , they outscored Bayern 2 - 1 in the two 1st halves , and were embarrassed 9 - 0 in the 2d halves . Why do contemporary Wenger teams capitulate so flagrantly ? Shows a documentary in animation of the famous anthropologist Mary Leakey . This documentary talks about Mary Leakey hard working , never giving up , attitude . The film tells stories about her love for her dogs . Many people want to know the history behind humans . Majority of the people around the world ask many questions related to who was the first human ? How were humans created in a world where scientists once said their was no living things ? How did they survive many years ? Mary Leakey had similar questions , but unlike those people Mary Leakey took action , she and Luis Leakey her husband set of to Africa . Luis Leakey and Mary Leakey were a great team while Luis Leakey sponsored is wife . Mary Leakey ancient artifacts , such as her great discovery of human ancestors footprints on the Africa savanna . Mary Leakey contributed in the discoveries of Paranthropus Boisei ( 1959 ) and Homo Habilis ( 1964 ) . Mary and Luis Leakey 's determination to search for answers of our human history allows people to become one step closer to finally figuring out our Human history .</p> <p>To add on Mary Leakey is an inspiration to anyone scientist in the world .</p>	0.0133

It was about a paleoanthropologist named Mary Leakey who was looking for human origin and past human events and bone structure . She is a very dedicated worker , sometimes taking several months , even years to finish a project .</p> <p>We saw this as she spent 2 years looking and finding a footprint , which shows how dedicated and determined she is .</p>	0.0117

She discovered track from bipedal human ancestor that is preserved with volcanic ash . The moment that stood out to me was when it took her two years to find the footprint because it show how much time she have to put into her work and how devoted she is to her goals . A message you can take away from this film is that people have to stick to their goals and work hard in order to achieve anything .</p>	0.013

She and her husband , Louis Leakey , discovered many ancient artifacts or remains . I was surprised at how much she loved her dogs , she give them butter even though they are rationing some of their foods .</p> <p>Her discovery of the footprints which show when human ancestor began walking on two leg was a result of her determination , this discovery allow human to better understand their origin .</p>	0.0126

It 's a shame , because I think German cuisine is underappreciated , and overdue for a reappraisal by American chefs . As someone with a spouse born and raised in Germany , we 've been looking for something more like what Mr. Hauck was trying . American versions of German restaurants seem to be a mixed bag .</p> <p>Certainly Mader's is very good , but many other restaurants either do the same old , same old , or overpower every dish with kraut / gravy and call it authentic .</p>	0.0117
58e2a0ba7c459f24986d8227	22054992	<p>Ironical that a poster here speaks to the " Americanizing " of a menu . I 've been to a number of German restaurants in the US with deep friend everything , including chicken wings . And I can tell you NO proper German rathskeller ever had chicken wings . Indeed what Ratzsch 's was will be missed . But it was a hard sell in a town that , based on these comments and others , is so clearly and intensely resistant to change or growth .</p> <p>I grew up going to Ratzsch 's . I 'm not going to mince words , this is sad . With all respect to Mr. Hauck , the changes were not to the good . The food and service were not up to the old standards , and the spartanizing of the decor seemed cheap . I think there were two options in saving Ratzsch 's . One would have been to double down on what had worked . Mader 's still packs them in . The other would have been to do more of a beer hall concept . If you wonder what that would have looked like , go to Munich . But the idea of Americanizing and spartanizing it while changing the recipes was not a good idea . I has the schnitzel before Christmas , and mine at home is better .</p> <p>I thank Chef Hauck for trying .</p>	0.0115

58e2a0ba7c459f24986d8227	22041254	Mr. Hauck could have saved himself some time and money by studying the fate of Luchow 's here in NY . A dinner at the original place was always a special event , especially around the holidays .  When it " simplified " itself and moved uptown into an office complex , it was a flop . The trick is to modernize the menu , but still keep the surroundings and the tastes that make the place special .	0.0111
58e2a0ba7c459f24986d8227	22037182	There are some modern Austrian - German restaurants that do this well , to the point where I could even detect some of my grandmother 's seasonings in some dishes ( and confirmed by the chef ) . And from what I read in The Times , traditional German cuisine is alive and well in Brooklyn . So why not Milwaukee ? Mr. Hauck took over a restaurant that may have been an institution forty or fifty years ago but had apparently been increasingly irrelevant and less profitable in more recent years .  Mr. Hauck 's approach might have been drastic ; however , his renovations and menu changes were not the ultimate cause for Karl Ratsch 's failure .	0.0117
58e2a0ba7c459f24986d8227	22036099	Restaurants like Ratsch 's fail because they fail to constantly adapt to changing demographics , tastes and economic realities . They fail because they foolishly adhere to an " if it ai n't broke , do n't fix it " mentality . If a chef / owner can not look out onto a dining room floor and see a diverse and renewing clientele , his or her business is irreparably broken . This was Ratsch 's fate . A similar fate awaits any restaurant that keeps the same unchanged decor and menu for decades . RIP Karl Ratsch 's . What a shame . From reading comments here and the in the local Milwaukee media , I wonder how many of the dissenters actually went to the restaurant after Mr. Hauck made his changes ? There were many traditional German dishes on the menu , and in the large portions that Milwaukeeans seem to still want .  His restaurant c 1880 is inventive and forward thinking and is probably not for everyone - but the touch that he put on Karl Ratsch ( menu , interior design , re-use of existing old photographs and antiques ) was incredibly respectful .  As a lifelong Milwaukee resident , I 'm sad the restaurant is gone , but also sad that a terrific local chef and business owner did n't get enough support .	0.0117

We gladly drove 70 miles to dine there . More recently and until the traditional menu disappeared , we still made sure to visit Karl Ratzsch whenever we returned to the Chicago area to visit relatives . Now , it is gone and we will miss it . The other German restaurants mentioned in the article ( Mader 's and Kegel 's ) were never even close to as good . Fortunately , there is still a fine German restaurant that is close to where we live now , Old Heidelberg in Fort Lauderdale . 590666517c459f24986dcfb7	22346533	<p>Where did we get the term " conspiracy theory " ? From the theory that there was a conspiracy to kill President John Kennedy . That theory has , 54 years on , been shown to be correct . The exact details may still be hidden from light , but the essential facts are all there to show that the notion that Lee Harvey Oswald , acting alone , killed the President is laughable . Thus there must have been , and was , a conspiracy to murder the President . But now the term itself has been twisted into being a put down , a slander , a mocking term to describe anyone and everyone who believes all manner of things , much of it utter nonsense , some of it very possibly true . Now there is no distinction between the nonsense ( vaccines cause autism , Sandy Hook never happened ) and the possible / probable ( the 911 attacks were allowed to take place ) . It 's an effective tool , to twist the term " conspiracy theory " into a direct association which crack - pottery . Label someone a " conspiracy believer " and you might as well call them crazy .</p> <p>When in fact , someone who believes that an unknown group of people , possibly within our own government , may have been behind a plot to assassinate President Kennedy , is not a " conspiracy theorist " like the Sandy Hook truthers .</p>	0.0166

( But I really doubt if there are many subscribers to the pedophile ring fantasy . ) I do n't see it as being a question of education - or at least , not academic education .  <div>The reasons they seem impossible to me have more to do with a general experience , over quite a few years now , of how plans actually work , or more often , do n't work , how the government operates , and so on - leading to a sense that most of what people sense is wrong with society is actually right out in the open .</div>	0.0165

You can now get yourself into big financial trouble right at home gambling on your smartphone as son as you are 18 ( ? ) and can get a credit card . Fantasy talk evolved into real insight . " Bill James and Rob Neyer and a whole generation of people who had begun the sabermetrics revolution would beg to differ . That real insight was already being developed independently long before fantasy sports exploded , fantasy sports just made the masses aware of those insights . Old - timers remember when professional football and basketball were nothing in this country .  Until television came along , gambling was a major element of their success .	0.0152

If your tab got too high , the utility was cut off . Also , he was a registered professional gambler with the IRS . Playing golf with law enforcement did not hurt . Nevertheless , after an NFL weekend the bookie generated a valise of earnings from the juice . The NBA was almost as profitable given they had more dates .  Long overdue . 58ff101c7c459f24986dbe78	22270103	<p>My European cousin .. Wants to know Why gambling is illegal in the USA . In Europe people love to gamble , as do people in the far east , in fact gambling is one of those things that unite civilizations , something all can agree is enjoyable and exciting . So he wants to know why Americans do not like gambling .</p> <p>I told him American love to gamble , that we are no slouch in this department we spend Billions just gambling on one event - the Superbowl .</p> <p>So , he asked , why ca n't they do what they enjoy ? Why make something they like to do illegal ? are n't you people the Yankee doodle boys , do n't you run your own country ? I explain to my European cousin , that gambling is allowed in certain cities , like Las Vegas . He wanted to know what make Las Vegas different from other cities , should n't something legal there be legal everywhere else . It ca n't be much of a crime if you can by whim and location make it legal . He asked me if gambling was legal in NYC . I answered that it was illegal in NYC , unless it s Horse racing , Again he did n't understand , why is one form of gambling is legal and another illegal ?. My Cousin left me with this : " You Yanks are very confusing , I know you people say you are the land of the free , but you have self imposed laws that check that freedom , i say Let people Gamble , the biggest gamble is life , and most of the time the dice come up snake eyes , so lets have some fun and excitement while we 're here . So , legalize marijuana and prostitution , bring them into the mainstream economy , and reap taxes that will pay for schools and hospitals and other good things . Win-win .</p>	0.0134

Problem Gambling - the hidden emotional disease . 1 / 4 of 1 % of sports gambling revenue for education , research and treatment would be humane . If Government is going to be in the problem making business of sports gambling they should be in the business of knowing what to do with problems that this gambling will cause to the population .</p>	0.0158

		In fact , the name of Beau 's first lover , Kip , put me in mind of Williams ' first love , Kip Kiernan , a relationship no less doomed than those Beau recalls in his beautifully rendered memories of loves and lives lost .

58e5a14b7c459f24986d8a54	22146576	<p>In an urban white gay male U.S. that seems to have forgotten that there is such a thing as HIV and AIDS , and is also seemingly unaware that there were millions of men who led thwarted , challenging , complex , even secret lives in a U.S. that routinely despised , ostracized and persecuted them because they were " queer " or " fairies " , this play is a needed reminder . These men learned to hate their essential selves , to fear retribution for living openly , to despair at and disbelieve in even the possibility of love . Beau has managed to survive , and to hang onto a thread of hope for lasting love , even though a lifetime of experience has taught him otherwise . The insufferable 28 year old Rufus is oblivious to all that Beau has had to endure just to survive , viewing him as an entertaining bibelot of an earlier age . Whether Rufus ever really learns anything from Beau other than Mabel Mercer 's song list is left hanging .</p> <p>And whether Beau is affirmed in believing in the impossibility of love , or in the sustained hope for it , is n't resolved .</p>	0.035
58e5a14b7c459f24986d8a54	22060776	<p>And rightly so . It 's never really either / or , is it ? There are no simple answers for Beau . As for Rufus , maybe with age , and experience outside his bubble , he 'll learn that there are no simple answers , and indeed that there are myriad questions he needs to learn to ask . A terrific play , and Harvey shines , and Gabriel Ebert does a good job with an essentially unsympathetic role . See it if you can .</p> <p>After watching GENTLY , I thought where did they find this play ? in the maudlin , cliché pile ? It 's essentially about a relationship that is n't so much developed but talked about . The whole play is talk except for when Sherman runs out of play and dated jokes he adds music , monologues and song - everything but trained seals .</p> <p>The Public over the years has tended to present weak script with social themes and / or for stars that are generally well acted and directed .</p> <p>But the social issue and the star did n't help GENTLY at all .</p>	0.0317

One of the main points of the play is about intergenerational love between two men – its pleasures and pitfalls – which is still a taboo subject in many respects .</p> <p>And the show 's " allure " besides Fierstein 's nuanced performance is the razor - sharp script , which is both humorous and heart - wrenching .</p> <p>The ghosts of the AIDS years were never far from mind during the play , and the " shout - outs " to Judith Peabody and Larry Kramer are crucial moments . This is the play about a late in life gay man navigating a world so different than the one he came of age in that I have been waiting for . It is , quite simply , exquisite .</p>	0.0359

Since this assignment was given to a reviewer instead of a critic , a few things remain to be said . The show deserves a rave . Sherman has crafted a beautifully designed and wonderfully articulate play .</p> <p>It ranges over a century 's worth of serious issues with ravishing wit in the course of perhaps the most mature domestic comedy ever devised on gay themes .</p> <p>All three actors deliver tour de force performances , and Harvey Fierstein 's , especially , is to die for .</p>	0.0348
